

AMV

WHY AUTOMAVIS

Remote inspection via smartphone

AI-based damage detection and classification

Damage linked to the corresponding vehicle part

Digital history with inspection comparison

Drive-through scanner

Handheld mobile scanner

Less manual handling. Faster access to structured information. Better use of assessors' time.

AMV

AI-POWERED VEHICLE INSPECTION

Vehicle intelligence from images.

AMV

Automated Machine Vision

SMART VEHICLE INSPECTION. ANYWHERE.

From mobile photos to structured information on vehicle condition and damage.

AI-powered vehicle inspection

Mobile access & Web platform

THE PROBLEM

VEHICLE INSPECTION CAN BE SIMPLER

Insurers need a fast, consistent picture of a vehicle's condition, without every case requiring the same manual process.

Time

Delays in collecting and assessing images.

Cost

Valuable assessor time spent on initial checks.

Consistency

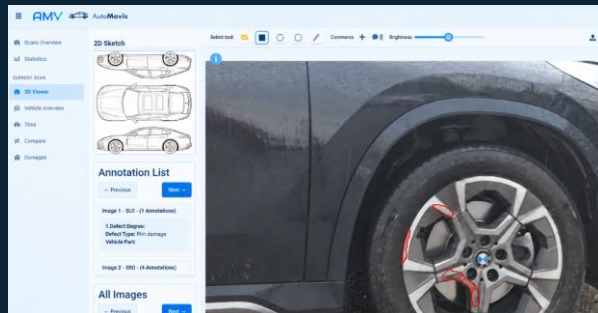

Documentation varies from case to case.

History

Difficulty systematically comparing a vehicle's condition over time.

AutoMaVis turns vehicle photos into a structured digital inspection.

THE SOLUTION

FROM PHOTO TO ASSESSMENT

01 CAPTURE

Image capture via smartphone

02 ANALYZE

AI-based image analysis

03 UNDERSTAND

Flags damage on the affected part

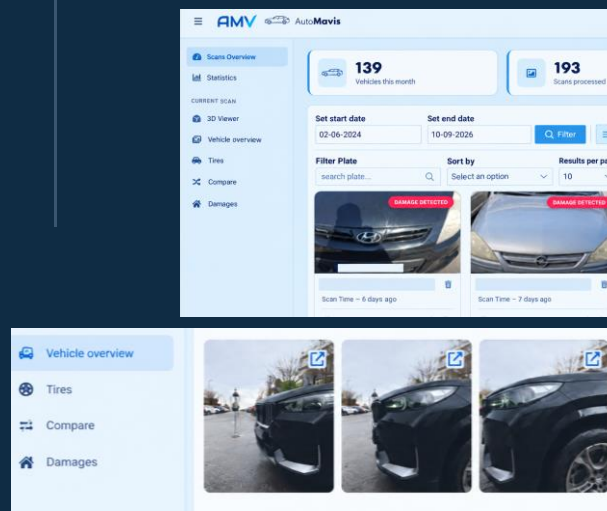

04 COMPARE

Comparison with the previous inspection, logging changes in vehicle condition

05 REVIEW

View results via the web platform or mobile

USE CASES

DESIGNED FOR INSURANCE PROCESSES

Pre-insurance inspection

Recording vehicle condition at the start or change of insurance coverage.

Claims / FNOL

Immediate first picture after an incident.

Claims triage

Identifying cases that need further review.

Vehicle condition comparison

Comparing vehicle condition over time.

Start with a Trial

Evaluate AutoMaVis on real vehicles and real insurance processes.

- Trial with your own data
- Evaluation on real use cases
- Adapted to the insurer's needs
